

PALLET RACK AVENGER

20 YEAR WARRANTY

FOR RACK AVENGER KITS*

Pallet Rack Avenger.com will repair or replace FREE OF CHARGE any parts or sections of any uprights damaged by forklift impact below the seat height on any RACK AVENGER KITS purchased. Standard heights for RACK AVENGER KITS ARE 24"H, 36"H or 48"H seats, however any other custom height will also be covered below the seat height determined at time of quotation or purchase. The seat height is determined by where the front upright post is cut off above the existing damage and the remaining front column then sits on the RACK AVENGER KITS.

Whether we install the RACK AVENGER KITS in existing racks at the customer's facility or we pre-fabricate uprights with the RACK AVENGER KITS already on the upright this warranty remains binding. Date of install or date that the customer receives the RACK AVENGER KITS upright is the commencement date that starts the twenty-year warranty. Pallet Rack Avenger will pay for all freight, travel, and installation labor related to warranted work. Non-operational disasters including, but not limited to, fire, explosion, acts of war, riots and acts of civil disobedience, vandalism, malicious mischief and other acts of nature, are not included in this warranty.

Pallet Rack Avenger will train your personnel to properly install our RACK AVENGER KITS. RACK AVENGER KITS installed by your trained personnel will be covered by our 20-year warranty. If for any reason kits are relocated without Pallet Rack Avenger's knowledge the warranty is voided. Specific engineering has been researched and tested on the RACK AVENGER KITS and the anchoring system provided must not be altered in any way for said warranty to remain valid.
